

Good morning Mr. Lewis

On Saturday February 22nd, we held our annual WICA meeting.

On behalf of the membership, we want to extend our thanks and appreciation for your efforts on behalf of Water Island the past year.

Mary, David and I reported to the membership of close to 100 families, that your office provided invaluable help to remove abandoned cars and roadside cutting help.

The roadside cutting help was invaluable. This improved the safety of the many tourists as well as residents trying to see around corners while driving.

Mr. Lewis, the one area I would like to improve is our communication. We realize you have a full workload.

WICA does not want to add to your project list, in fact as our record demonstrates the purpose of our group is to provide a partnership to every administration to make your job easier. If you prefer telephone calls or quick meetings, please let me know?

I have been elected President for 2020 and Mary Dunakey is again Vice President. David Roselle is chairperson for several important committees, to include Roads/Roadsides and Abandoned Car projects.

Based on our small community size, we try to do the projects we can with your permission. For example, during the year, WICA spent almost \$10,000, as well to cut roadsides, our largest expenditure of our very limited budget.

We would be happy to meet you on St. Thomas or Water Island to discuss how we can assist.

Again, please accept our thanks for your efforts on behalf of Water Island and we look forward to meeting with you.

**Best regards
Joanne Bohr
President
Water Island Civic Assc.**
